If you are interested in working in a fast-paced environment surrounded by enthusiastic and self-motivated people, then look no further. The Office of the State Controller (SCO) is in the process of moving in the direction of becoming the destination employer within the State of California.

Scope of the Position:

Under the general direction of the Applications Development Manager (Data Processing Manager II), the incumbent develops, tests, and supports system customizations and interfaces for the implementation of the new, statewide, HR/Payroll system using industry-leading software from SAP. This position is a member of a technical team working closely with consultant and functional teams to align SAP processing with SCO business needs and to integrate data exchanged between SAP and statewide entities. All members of the team receive formal training and extensive consultant mentoring in the use of the SAP platform. Specific duties include, but are not limited to the following:

Duties and Responsibilities: (Candidates must perform the following functions with or without reasonable accommodations)

- For system customizations and interfaces, develop technical specifications from functional, build and test programming code and processes, participate in specifications and code reviews and in the multiple stages of testing and review.
- Participate in technical products deployment planning, testing, production releases and post-deployment support activities.
- Follow project and SCO policies, procedures, processes, and standards in application development, software quality assurance, and configuration management.
- Evaluate and resolve moderately complex technical problems in the software development and operational environments.
- Provide inputs and updates to work-plans and schedules by estimating work effort and completion dates for technical products; maintain progress and management reporting.

Desired experience and knowledge (not all required)

- COBOL, Natural (4GL), other procedural programming languages
- ERP: HR/Payroll, SAP, Peoplesoft, Oracle, other
- SQL, DB2, Oracle, Adabas or other DBMS environments
- C, C++, Oracle Forms, PowerBuilder or OO programming

Other Information

Extensive SAP training, Project team environment, Free parking
